

Magnetic Liners for Aggregate Operations

**NO BOLTS.
NO PLUGS.
NO WEAR.**

DESIGNED AND BUILT TO MATCH YOUR UNIQUE APPLICATION

Durex now offers a full line of magnetic liner solutions, custom-designed for aggregate plants. Magnetic liners deliver excellent wear resistance that outlasts most steel liners, and they replace the lengthy installation process of bolting and welding on traditional liners.

WHY MAGNETIC?

Our magnetic attachment system offers easy attachment to steel surfaces. The unique urethane formula is soft enough to bend around steel areas and provides strong magnetic attraction that will hold for both static and vibratory applications. This magnet design also allows for the best placement of the magnets for optimal attachment, so they may be field installed quickly and cost-effectively.

WHY URETHANE?

Urethane products are longer-lasting and much lighter than steel, allowing for easier handling and installation. Any necessary trimming can be handled in place with a sharp knife or reciprocating saw. Steel cutting in enclosed areas is considered a safety hazard and requires removing the liners for adjustment, which is time-consuming and cumbersome.

WHY DUREX PRODUCTS?

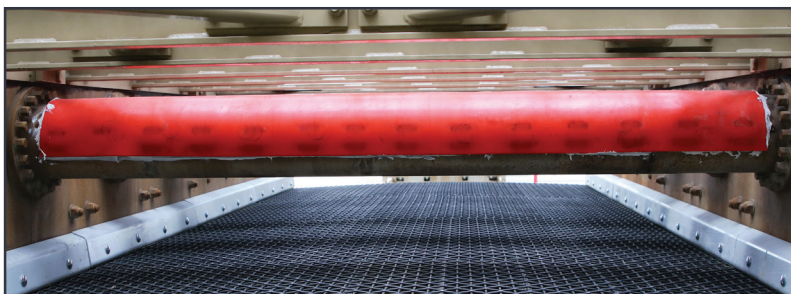

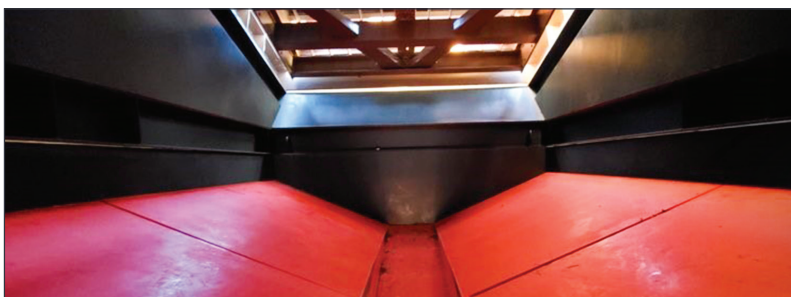

Specialized polymer formulas, combined with our experience in precision, open-cast manufacturing processes, result in urethane wear parts and liners that provide unmatched quality and performance. Our wear parts are cost-effective and will combat impact, abrasion, noise, and sticking in wet or dry applications, hot summers, and very cold winters.

WEAR-RESISTANT MAGNETIC LINERS FOR AGGREGATE EQUIPMENT

Our magnetic liners and parts are available in some standard sizes. Custom design services allow infinite options for shapes and sizes. Our designs are engineered specifically to each equipment piece for customized fit, strong attachment, and optimal wear life.

RECOMMENDED APPLICATIONS

- Static and vibratory chutes and wear areas
- Rotary distributor/turnheads
- Sand slurry flumes
- Crusher mainframes
- Feed boxes
- Side wear plates on screen decks
- Discharge lips
- Cross supports between bucket bars and stringers
- Shaft covers
- Quick patches for worn-through high-wear areas
- Inspection doors on machinery

Drawing from our years of field experience and an unparalleled dedication to customers' and dealers' needs, we also offer onsite training and support.

ASK ABOUT OUR SCREEN MEDIA LINES

- **Woven and Slotted Wire Screen Media:** Square, Rectangular, Long-Slot Triple Shoot, Mesh
- **Self-Cleaning Wire Screen Media:** Livewire®, Accuslot®, Vibraspan®
- **Modular Urethane and Rubber Screen Media:** Classic, 2k, Knock-in-Bar, P-Pin, P-Pin Maxi
- **Side-Tensioned Screen Media:** Armor®, Cable-Reinforced, Urethane and Rubber, Perforated Plate
- **Large-Opening Screen Media:** Flame-Cut Plate, Bolt-Down Rubber, Grizzly Bars

ASK ABOUT OUR LINERS AND ACCESSORIES

- **Magnetic, Plain, Plug-Weldable, and Bolt-On Liners:** Urethane, Rubber, Ceramic-Embedded
- **Accessories:** Side-Tension Rails, Tension Wedge Assembly, J-Bolts, U-Bolts, Donuts, Spray Pipe Seals, Profile Impact Pads, Stringers, Bucket Bar Covers, Skirt-Board Lining, etc. — Steel, Urethane, Rubber
- **Liners for Concrete Plants and Trucks:** Urethane, Urethane-Ceramic, Rubber-Ceramic
