

STONE AND SAND ARE TOUGH.

DUREX IS TOUGHER.

DESIGNED AND BUILT TO MATCH YOUR UNIQUE APPLICATION

Durex offers rubber screen media, wear-resistant liners, and parts solutions that provide long wear life, reduced noise, and superior performance for your equipment. Choose from our standard screen media, wear liners, and parts — or we can design custom solutions. Our rubber products deliver outstanding efficiency and wear life even in the harshest conditions.

WHY RUBBER?

- **Excellent Production:** Rubber screens resist plugging and offer longer wear life, reducing downtime and increasing production.
- **Noise Reduction:** Rubber screens are known for their ability to dramatically reduce noise, making them an optimal choice for pre-screening, scalping, or primary screening. Rubber wear liners offer noise-reducing properties wherever they are installed.
- **Long Wear Life:** Rubber screens increase wear life in abrasive or high-impact applications, such as pre-screening large material or in feeds with considerable drop height. Rubber and rubber-ceramic liners are ideal for the harshest of wear areas including turn heads, flop gates, and belt-transition areas.

WHY DUREX PRODUCTS?

Our rubber products are cost-effective and will combat impact, abrasion, and noise in wet or dry applications. Dedicated attention to our customers' and dealers' needs comes from years of field experience. We supply the best materials for your application — saving you money in maintenance and downtime.

RUBBER SCREENS, WEAR-RESISTANT LINERS, AND PARTS FOR AGGREGATE EQUIPMENT

MATERIAL

- 60-Durometer
- 40-Durometer

SCREENS

• Rubber Modular Screens

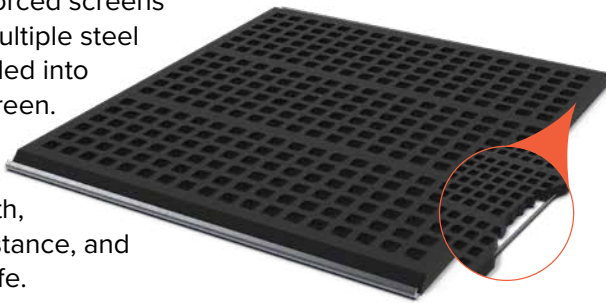

Durex rubber modular screen media is easy to install and provides long wear life and elasticity in dry or damp conditions. Rubber screen media panels are available in Modular Classic, 2000, Knock-In Bar, and P-Pin systems. Tapered openings that are wider at the bottom reduce plugging and increase throughput.

• Cable-Reinforced (Type C) Screens

Cable-reinforced screens comprise multiple steel cables molded into a rubber screen.

The design ensures high strength, impact resistance, and long wear life.

• Bolt-Down Rubber

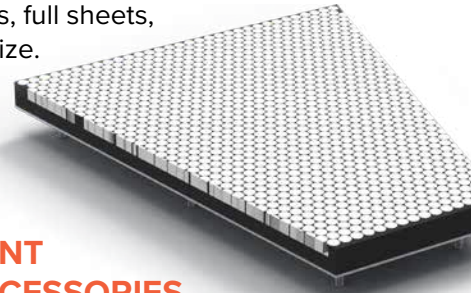

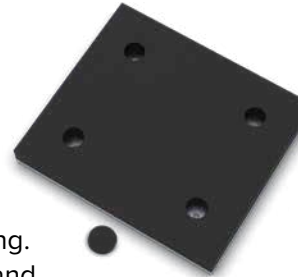

Bolt-down rubber screens are designed for excessively harsh conditions in scalping applications. They provide a combination of long wear life and high throughput.

Tapered openings that are wider at the bottom reduce plugging. Opening sizes and bolt hole locations can be customized to fit different screening machines.

WEAR-RESISTANT LINERS

Our wear-resistant rubber and rubber-ceramic liners provide long-term protection for your equipment and will combat impact, abrasion, noise, and sticking. Rubber liners are offered in plain and metal-backed sheets, full sheets, or can be made to size.

WEAR-RESISTANT PARTS AND ACCESSORIES

Our wear parts will greatly outlast the typical steel parts used in sizing and separating on screens and various chutes and transfer areas.

Durex designs and builds numerous high-performance wear parts and accessories, including, but not limited to, the following:

- Donuts
- Side-Tension Rails
- Channel Rubber

ASK ABOUT OUR SCREEN MEDIA LINES

- **Woven Wire:** Square, Rectangular, Long Slot Triple Shoot, Mesh
- **Self-Cleaning Wire:** Livewire®, Accuslot®, Vibraspan®, Vibraclean®
- **Modular Urethane and Rubber:** Classic, 2000, Knock-in-Bar, P-Pin, P-Pin Maxi, P-Snap, P-Snap Maxi
- **Side-Tensioned:** Armor®, Cable-Reinforced, Urethane and Rubber, Perforated Plate
- **Large-Opening:** Flame-Cut Plate, Bolt-Down Rubber, Grizzly Bars

ASK ABOUT OUR LINERS AND ACCESSORIES

- **Magnetic, Plain, Plug-Weldable, and Bolt-On Liners:** Urethane, Rubber, Ceramic-Embedded
- **Accessories:** Side-Tension Rails, Tension Wedge Assembly, J-Bolts, U-Bolts, Donuts, Spray Pipe Seals, Profile Impact Pads, Stringers, Bucker Bar Covers, Skirt-Board Lining, etc. — Steel, Urethane, Rubber
- **Liners for Concrete Plants and Trucks:** Urethane, Urethane-Ceramic, Rubber-Ceramic
